

start something special for your VXR8

With Walkinshaw Performance, you can now take the VXR8's raw power and excitement to a whole new level.

Walkinshaw Performance has been selected by Vauxhall to partner the development and marketing of speciality tuning products for the new E Series VXR8 model. The expertise of Walkinshaw Performance in respect to the modification of the VXR8 from the Australian HSV experience, is critical in enabling the company to offer VXR Dealers the most appropriate and exciting enhancement products for the vehicle.

SUPERCHARGER

The Walkinshaw Performance supercharger for VXR8 is the ultimate horsepower upgrade offering smooth reliable performance, professionally installed by qualified technicians. Approximate power gain 30% over and above standard engine output.

EXHAUST SYSTEM

Specifically designed by Walkinshaw Performance, this high grade stainless steel CAT back system is perfectly suited to your VXR8. The system will enable your 6.0L to breathe and releases an unmistakable V8 rumble both on idle and under acceleration.

BRAKE UPGRADE

For the ultimate stopping power, Walkinshaw Performance offers an exclusive 6-piston (front) and 4-piston (rear) calliper upgrade for your VXR8. Light weight callipers with increased rigidity and exclusive Walkinshaw Performance branding are a must have.

SUSPENSION

The lowering kit includes four replacement Walkinshaw Performance engineered and branded linear springs (25mm lower ride height) with unique rear bump rubbers and genuine replacement fasteners. For enhanced performance and appearance while maintaining excellent ride and comfort, there is no other option.

FOG LIGHT COVERS

Polycarbonate driving light covers assist with protecting driving lights and the front fascia. This accessory really differentiates the front-end appearance and is the perfect finishing touch to any Walkinshaw Performance enhancement.

POWER PACK

Do you want even more power from your 6.0L? Then look no further that the Walkinshaw Performance 'Power Pack'. The Power Pack includes: an ECU recalibration, a replacement high flow BMC air filter and the unique CAT back exhaust system. The pack provides increased power and torque, while at the same time, improving driveability. Mid range response between 2,000rpm and 5,500rpm is dramatically improved as is the exhaust note at idle and under acceleration. Power and torque is improved by approximately 20kW (26hp) and 58 Nm (42ft-lbs) over and above standard engine output.

WHEEL AND TYRE UPGRADE

Walkinshaw Performance offer a huge 20" deep dish, chrome shadow finish wheel to suit your VXR8. The wide 20"x9.5" rear wheels provide optimum grip while significantly enhancing vehicle appearance. Enquire today!

DVD PLAYER

An integrated DVD player with fold down screen is available for VXR8. The system is designed for use by rear seat passengers and incorporated into the roof and comes complete with wireless headphones and a remote control.

MERCHANDISE

Also available is a wide range of Walkinshaw Performance and HSV merchandise including: dress shirts, polo shirts, polar fleece vests, caps and much more.
